

AKASH PANWAR

Dehradun, Uttarakhand

akashpanwar9976@gmail.com · github.com/akshpnwr · linkedin.com/in/akash-panwar · akashpanwar.dev

Summary

Full-stack developer, three years shipping production web software. Former founding engineer at **TalentGPT**, where I built a multi-tenant hiring SaaS, with **six client platforms live in production**. Core stack: React, Node.js, Express, MongoDB/MySQL.

Experience

TalentGPT | [URL](#)

OCT 2025 – AUG 2026

Founding Engineer

Remote

- Built a **job portal SaaS platform** end to end, enabling recruiters to manage job postings, candidates, and hiring workflows from a single system.
- Designed scalable backend services in **Node.js, Express, and MongoDB**, implementing APIs for job listings, applications, and user management.
- Implemented **ATS-style candidate scoring, filtering, and search** with server-side pagination and query optimization to improve recruiter efficiency.
- Developed the responsive front end with **React + TanStack Router/Query**, ensuring smooth data fetching and real-time UI updates.
- Integrated authentication, role-based access, and organization-level permissions for a **multi-tenant SaaS architecture** isolating each company's data on a shared codebase.

Freelance Full-Stack Developer

2024 – PRESENT

Contract Engineering · SaaS & E-Commerce Platforms

Remote

- Designed, built, deployed, and maintained **6 platforms now live in production** — including **iReportify** (marine reporting SaaS), **realestateverifiedleads.ai** (AI lead-gen SaaS), **James Aston**, and **Furnicheer** — each owned solo from architecture through launch and ongoing support.
- Shipped full-stack applications on **React, Node.js, Express, MySQL/MongoDB, Prisma and Sequelize**, with AWS S3 media pipelines and role-based access control.
- Delivered custom **Shopify** storefronts (Liquid, Dawn & Broadcast themes) for luxury and handcrafted-goods brands, including bespoke sections, collection merchandising, and checkout tuning.
- Worked directly with founders to translate business requirements into shipped product, handling scoping, deployment, and post-launch iteration without a supporting team.

Phemesoft (IBM Mentorship)

JAN 2024 – APR 2024

Project Intern

Remote

- Developed a machine-learning project under IBM mentorship using **Python, scikit-learn, and TensorFlow**.
- Implemented k-means clustering to personalize song recommendations, improving recommendation accuracy by **25%**.

Closetnerds

FEB 2023 – MAY 2023

Frontend Developer Intern

Remote

- Crafted responsive webpages with **ReactJS**, reducing page load times and elevating user engagement.
- Collaborated with the design team on UI/UX improvements that increased website usability.
- Drove debugging and troubleshooting work contributing to a **15% decrease** in website downtime.

OPPO

MAR 2023 – JUN 2023

Content Writer Intern

Remote

- Produced gaming-community and mobile-games content for the Indian market, driving a **15% increase** in audience engagement, with research and analysis that improved content relevance by **20%**.

Projects

iReportify | [React, NodeJS, ExpressJS, MySQL, Sequelize, AWS S3](#) | [URL](#)

- Marine inspection-reporting SaaS letting engineers and supervisors capture, upload, and share image-based reports from anywhere at sea — live and in use by shipping professionals worldwide.
- Built a React front end over a Node/Express/MySQL backend with Sequelize ORM and AWS S3 image storage.
- Implemented report generation, folder organization, and custom cover pages, replacing hours of manual paperwork.

realestateverifiedleads.ai | *React, Tailwind, Vite, Framer Motion, MySQL, Prisma* | [URL](#)

- AI lead-generation SaaS connecting real-estate teams with voice-verified property buyers, live in production.
- Built a 5-tier qualification flow that filters unverified leads before they reach the sales floor, bridging mass outreach and precision conversion.
- Implemented role-based access control over a MySQL + Prisma backend, keeping each stage of the sales workflow scoped to its own team.

Easy Prime Holidays | *JavaScript, HTML, CSS, Firebase Auth, Firestore* | [URL](#)

- Travel-discovery and booking platform for Himalayan tourism, with search across destinations, dates, and party size.
- Integrated Firebase Authentication for user accounts and Firestore for real-time storage of destinations, blogs, and enquiries.

James Aston | *Shopify, Broadcast Theme, Liquid, JavaScript* | [URL](#)

- Custom Shopify storefront for a premium full-grain leather house, live and taking orders across men's, women's, and corporate-gifting lines.
- Customised the Broadcast theme with bespoke Liquid sections for editorial collection stories, a layered product catalogue, and a checkout tuned for high-consideration purchases.

Furnicheer | *Shopify, Dawn Theme, Liquid, JavaScript* | [URL](#)

- Storefront for a handcrafted solid-wood furniture brand shipping across India — pooja mandirs, swings, and made-to-order pieces.
- Customised the Dawn theme with Liquid for editorial category layouts, collection merchandising, and enquiry-driven flows for commissioned work.

Baluni Public School | *Wix, CMS, HTML, CSS* | [URL](#)

- Full institutional website for a CBSE-affiliated school in Dehradun, covering academics, admissions, student life, gallery, and contact for prospective parents.

JS Journal | *ReactJS, esbuild, Redux* | [GitHub](#)

- Browser-based JavaScript prototyping code editor built on Monaco Editor, with esbuild for in-browser bundling and transpiling and Redux for predictable state.
- Published to npm — initialized with `npmx js-berry-journal serve`.

Education

UPES Dehradun <i>Master of Computer Applications (CGPA: 8.7)</i>	AUGUST 2022 – JUNE 2024 <i>Uttarakhand, India</i>
Uttaranchal University <i>Bachelor of Computer Applications (CGPA: 8.6)</i>	AUGUST 2018 – JUNE 2021 <i>Uttarakhand, India</i>

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, SQL
Frontend: React, Remix, TanStack Router/Query, Redux, Zustand, Tailwind CSS, Shadcn UI, Vite, HTML, CSS
Backend & Data: Node.js, Express, MongoDB, MySQL, Prisma, Sequelize, REST APIs, WebSockets, Firebase (Auth & Firestore), AWS S3
Platforms & Tools: Shopify (Liquid, Dawn & Broadcast), Wix, Git, Postman, VS Code, esbuild, Monaco
Domain: Full-stack web development, multi-tenant SaaS architecture, e-commerce

Extra-Curricular

Student Developer — Website Team, UPES OPEN Community	2022 – 2023
- Core member of the website team; built the site for the Dehashed event organized by UPES-OPEN and WEBCRUX (dehashed.in). - Developed the front end of the UPES-OPEN community website (upes-open.org).	

Achievements

- **HackerRank Gold Badge — SQL**, demonstrating strong database query and data manipulation skills.
- **Certificate of Excellence** — Best Performer, Website Team, OPEN Community (2022–23).
- Contributor badge, **Hacktoberfest 2022**.
- Udemy certifications — **React & TypeScript** (Stephen Grider, 2024) and **React: The Complete Guide** (Academind, 2023).
